PROFESSIONAL SUMMARY

Software developer with nearly 3 years of experience building scalable web applications. Improved application speed by 20–30% while delivering features used by 200K+ users. Experienced in API integration, secure login systems, state management, and frontend optimization. Open-source contributor to the Renovate project.

TECHNICAL SKILLS

Frontend: ReactJS, NextJS, JavaScript (ES6+), TypeScript, Redux Toolkit, Tailwind CSS, Material UI

Backend & APIs: NodeJS, ExpressJS, RESTful APIs, JWT Authentication, WebSocket

Databases: MongoDB, MySQL

Testing & Quality: Jest, React Testing Library, Unit Testing, Code Review

Tools & DevOps: Git, GitHub Actions, Docker, AWS Lambda, CI/CD, Vercel

KEY ACHIEVEMENTS

- Increased UI load speed by **20%** through code splitting and frontend optimization.
- Contributed to Renovate by improving **LibYears calculation** and expanding automated test coverage through maintainer-reviewed PRs.
- Delivered a scalable analytics dashboard supporting **200K+ users**.
- Implemented JWT authentication and RBAC workflows, reducing unauthorized access issues by **30%**.
- Optimized API and MongoDB data workflows, improving processing efficiency by **25%**.

WORK EXPERIENCE

Software Developer

Oct 2023 – Present

Bestpeers Infosystem Pvt Ltd

Indore, INDIA

- Engineered scalable web applications using ReactJS, NextJS, NodeJS, and ExpressJS, improving application performance by **30%**.
- Combined RESTful APIs with JWT-based authentication, Redux Toolkit state management, and MongoDB-backed modules.
- Implemented accessible and responsive UI systems with consistent cross-browser compatibility across production environments.
- Collaborated with cross-functional teams to deliver production-ready features within Agile workflows.

PROJECTS

Armory Inventory Management | [Armory Inventory Management](#)

NextJS, NodeJS, ExpressJS, MongoDB, Redux Toolkit

- Streamlined core armory modules, increasing application performance by **30%**.
- Added secure backend APIs with RBAC-based protected workflows.
- Developed reusable UI components and shared utilities, reducing development time by **25%**.

Aviation Week | [Aviation Week](#)

ReactJS, Redux Toolkit, Material UI, Highcharts

- Designed an aviation analytics dashboard for visualizing **10K+** data points.
- Implemented interactive charting solutions that improved analytical efficiency by **25%**.
- Crafted accessible UI layouts that scaled seamlessly across multiple screen sizes.

EDUCATION

Bachelor of Technology in Computer Science Engineering

2019 – 2023

Rajiv Gandhi Proudhyogiki Vishwavidyalaya (RGPV) University

CGPA: 8.29
